POWERSPREAD PRO

ORDERING SPARE PARTS

IMPORTANT

Your Powerspread is made up of a Machine assembly number (common parts), specific sub assemblies and also customer optional build kits. The machine, sub assemblies and optional kit numbers are listed in the front pages of your Operators manual, part no. MAN-06210.

If you do not have these numbers please contact Shelbourne Reynolds Parts Department direct on (telephone) 01359 251231.

To ensure that you order the correct part from your SRE dealer please use the following procedure.

ALWAYS QUOTE THE MACHINE AND SERIAL NUMBERS WHEN ORDERING.

Refer to the Parts Manuals front page/s, listing the machine assemblies. Select the correct machine assembly number which is printed in the top left corner of the page (starting with 6099__ 01), This machine number can also be taken off the Powerspread identification plate located on the front of the main chassis beam.

On this page you will find the parts listing for the common parts for every configuration of that machine assembly number. You will find the corresponding drawing by either looking at the facing page or progressing through the manual to the next drawing. The drawings indicate the components by item numbers, which you will find, are repeated in the left-hand side of your parts listing, and therefore referring to the correct part.

Note all parts will not be found listed below the machine number. Other parts will be from specific sub assemblies and optional kits. These sub assemblies and kits will be found in numerical order further through the manual.

Sub assemblies start with 6090__ 01 and kits start with KIT- ____.

List Of Kit Numbers

609905 01	Powerspread Pro 2400-3200	1
609905 02	Powerspread Pro 1800	3
